Alfabetical list of deposition of waste

Updated 27-09-2020

Packaging containing (or has contained) "hazardous substances" as for example painting, flammable liquids or chemicals that cannot be cleaned effectively must always be handed in at the container yard.

Future updates to the list will only take place on Flintemarken's website!

NOTE! For the time being, all bio-waste must be disposed of as residual waste in the same bag.

Bio and residual waste must be placed in a waste bag when it is disposed of. The bag must be securely closed!

Waste deposited in the container yard must be distributed in the respective containers.
